Get to know **Kind Mind**

Kind Mind PSA was created for companies that seek to increase their team's productivity, want to optimize project time and improve safety. We are forerunners in auditing and transforming organizations.

We consult and restructure - implement business management strategies based on delivering the expected goods to customers, in the simplest way possible.

We transform companies in terms of Agile & Lean. We train management and teams, influence mindset. We implement change, optimize the way we deliver value. We create self-organizing teams.

In our software house - we create applications. We provide companies with attributes towards the implementation of change. We have proprietary tools:

- Framework EASy;
- TeamBox360 application;
- cyber security control tests;
- training.

We focus on the needs of the future. We support business through a proprietary operating model. We enhance innovation and efficiency in product development. We rely on open concepts.

Kind Mind it expertise.

_software house

Choose dedicated IT solutions and gain a competitive advantage. Benefit from our knowledge and experience, to create software that meets your needs and your customers' expectations.

Dedicated software

We provide solution integration e.g.: with IoT technologies, which increases process efficiency.
We create personalised products, tailored to your needs and requirements.

Web applications

Comprehensive and diverse services related to software, including customised software, software integration and software development.

Mobile applications

Development services for Android mobile apps, iOS mobile apps and apps using the Flutter platform.

Software testing

A variety of quality control and software testing services, including quality consultancy and auditing, comprehensive application testing, test automation and independent testing.

Devops and cloud solutions

Efficient IT infrastructure management. Solutions include building a cloud-based architecture, managing and maintenance of applications, CI/CD processes and monitoring.

Outsourcing of IT specialists

Outsourcing, outstaffing and dedicated Agile team building services. Skilled IT professionals to help you deliver your projects to the highest standard.

Building an MVP

We provide full support in the process of idea validation, prototyping and application building. We implement projects into the market. We create new products and services.

Consulting services

Our offer includes product workshops, product strategy development and closed-door training. We analyse and identify business areas for improvement and indicate the development strategy.

Business analyst

We focus on finding new product and service solutions, working with existing software and improving business processes. Explore the new possibilities of business analytics.

TeamBox360

FOR ORGANIZATIONS

Best application

developed directly for the organization

TeamBox360 reduces an organization's costs and engages employees in its life in a new dimension.

TeamBox

An integrated platform for communication within teams and collaboration between teams, with features such as: team chat, forms, dashboards, calendar, lists, videoconferencing, messaging, transfer of photos and meeting files, notes, voice communication.

Process analytics

A dedicated component for creating workflow processes and analyzing the business impact of events in teams on the entire organization.

Emergency

Integrated with the TeamBox360 app, a place for users to report potentially dangerous health and safety, cyber security, legal situations, etc. Ensures alerts from the organization are communicated to all employees.

Problems

With this feature you identify and level out the problems of your organization, thereby reducing time and costs - you create LIVE projects that do not require additional meetings - employees get involved with pleasure in implementing solutions to improve the organization's structures.

Innovations

With this feature, you create cutting-edge LIVE projects to implement innovations that affect the better the performance of your organization. Again, you reduce time and costs, and implement projects better and faster.

Knowledge base

No more time-consuming exchange of information between the structures of the organization. The knowledge base is a bank of documentation on regulations, bylaws, rules for the correct functioning of the company.

Feedback360

Unite people by offering them an ideal place of employment. Increase productivity in your organization through job satisfaction. Feedback360 gives you the opportunity to give direct feedback. Build openness, respect, correct relations in the organization, so that you work better.

Statistics

An innovative way to visualize the results and progress of your organization's project work. All projects you are involved in in one place. Implementation status, reminders, calendar. Concrete and reliable information provided and updated in real time.

OCR scanner

No more transcription of important data. State-of-the-art document entry through intelligent scanning. Use artificial intelligence module that will complete your company's data with the help of scanning. Influence the convenience of your work by automating it. Save time and money by reducing errors.

Signalmen

In accordance with European Parliament and Council Directive (EU) 2019/1937, the function provides a confidential reporting channel for your organization. File a complaint by providing your information or remain anonymous. Undertake an investigation. Designate an independent person or entity to handle the report. Train employees and colleagues. Build trust and have an impact on the proper functioning of the organization.

_SOC

Security Operation Center

Security Operation Center is a core component of the Information Security infrastructure, SOC is equipped with tools and resources to **monitor, detect, respond to and counter cyber threats.**

For mid-sized companies, using SOC services can bring many benefits, including ensuring effective protection against cyber attacks, minimizing damage from incidents and increasing the confidence of customers and business partners.

Our **SOC** offering for mid-sized enterprises consists of several components:

- we offer implementation and configuration of security monitoring systems, such as SIEM (Security Information and Event Management) and IDS/IPS (Intrusion Detection/Prevention System);
- we provide monitoring and threat detection services, both in real time and at the level of historical data analysis;
- we provide rapid response to incidents to minimize damage from cyber-attacks;
- we also offer malware prevention and removal services.

_cyber security

We will check the safeguards required by law depending on the scope of the business. We will implement safeguards related to the need to prepare processes for possible events. Our priority is to secure the business for damaging circumstances.

Security audit:

- web applications;
- infrastructure;
- socialengineering;
- vulnerabilities - hacking.

Security

Validation of security features

Risk Centrum

Managing risks in one place

Incidents

Checking the ability to respond to indirects

- Security assessment, audits, consulting, solution integration;
- Consolidated IT risk assessment - networks, infrastructure;
- Security assessment on prem, on cloud, vulnerability scanning;
- Security process assessment;
- IT process assessment (SDMC);
- Red Team - Cyber attack simulations with after analysis;
- Social engineering tests;
- ISO27001:2013, RODO, NIST, BSI IT-Grundschutz audits;
- Implementation of devsecop processes;
- Inventory of resources;

Strategy and documentation:

- Maturity assessment;
- Performance and stability assessment of infrastructure, web sites;
- ISO/IEC 27001, ISO/IEC 27032, ISO 22301, TISAX compliance audits.

IT infrastructure protection implementations:

- Security operation center;
- File server protection;
- Security management;
- Endpoint detection and response.

SIEM/SOAR solution implementations

(SIEM - Security Information and Event Management)
and SOAR (Security Orchestration, Automation and Response).

AI-based MDR/XDR implementations (detection and response management/enhanced detection and response).

Cyber security program - IMS - information management system
Center of risk (kindmind's proprietary solution).

Offer long-term services, subscription or recurring.

External CISO - chief information security officer.

_consulting

Consult the Agile and Lean transformation of your organization.

Be EASy, Lean & Agile.

- We analyze the organization's strategy and assess business conditions, openness and readiness for change;
- We support in the selection of solutions;
- We change manufacturing processes into fully perceptible, effective values, obtained in an iterative manner;
- We transform and restructure organizations according to Agile and Lean philosophies. Depending on the demand of scaling the effectiveness of agile transformation resulting from the audit developed by us - proprietary, using tailored Framework`s such as:
 - Scrum;
 - Large Scaled Scrum (LeSS);
 - Nexus; Kanban;
 - Lean Managment;
 - Scaled Agile Framework (SAFe),
 - EASy – nasz autorski Framework.

We support project management in an agile approach.

_framework EASy

Based on empiricism, we have created a modern, flexible EASy Framework. With its ideology and timeless pattern, it supports based on its own pillars viz:

- trust,
- ethics,
- ulture of work,
- maturity,
- Frameworks such as Scrum; Large Scaled Scrum (LeSS); Nexus; Kanban; Lean Management; Scaled Agile Framework (SAFe);

The **EASy framework** gives organizations new insights into the correct management of human resources, the way people who make up teams work; the culture of teams and their ethics, thereby increasing productivity and enhancing a sense of job security - certainty and satisfaction in doing work. It naturally creates sets of moral precepts.

Easy is the world's first framework that works with a dedicated application, introduced by KindMind.

EASy is creating a modern model and style of work and influencing:

- A new perspective on roles in teams
- Reduction of costs for the organization
- Delivering value to the customer
- Improving workplace relationships through rituals

The end result is: an impact on the workflow of teams, prioritization over other Frameworks, and a feasibility timebox that depicts team effectiveness resulting from enjoyment based on satisfaction metrics.

[_ EASy Certification](#)

Get certified

It is possible to get certified with the EASy Framework. We certify organizations in a correct, innovative team management solution.

_training

We have a unique training system based on **Value stream**.

Acquiring requirements for the scope of training, we start from the client's side - we acquire criteria and visualize the scope - we transform the concept into a training program that is flexible to the realities of the organization, confirmed by such criteria as:

- the number of people to be trained,
- availability of participants,
- length of the training cycle,
- expected effectiveness.

We train employees regardless of their level of implementation in the organization. Dedicated training is designed to support the development and creativity of people in the organization.

Through appropriate tools, we build awareness and competence of specialists. We influence the mindset of decision makers, including teams. We create correct in their specialty members of the organization.

OFFER INCLUDES:

- Scrum Master training,
- Product Owner training,
- Training symbiosis of Scrum Master and Product Owner roles,
- Cyber security training basics,
- Kanban training - application,
- Agile training - agility in the organization,
- Agile training - preparation for transformation,
- Lean Management training,
- Lean training in an organization,
- Lean training for teams,
- Leadership coaching,
- Coaching of teams - building leadership position,
- Coaching teams - organization awareness.
